

pick the right spot for your plant

SOUTH

brightest light
bright direct
light all day

WEST

medium light
bright indirect light
in the evening

THE plant
project

EAST

low / medium light
bright indirect light
in the morning

NORTH

lowest light
zero direct light

1

bright direct light

try succulents &
cacti in these
windows

2

bright indirect light

most tropical
plants like this kind
of light!

3

medium indirect light

ideal for monstera
and other plants
prone to sunburn

4

low light

try a zz or a snake
plant in these
areas but don't expect
much growth!

5

no light use a grow light

these areas need
help from grow
lights to have plants
